## *Flea Preparation Sheet*

Here is how to prepare for flea treatment:

### **Preparation:**

1. Carpets and upholstered furniture should be vacuumed thoroughly before treatment, then vacuumed frequently following treatment beginning the next day for a period of at least two weeks.
2. Pets should be removed from the premises until it is safe to return (generally within three hours).
3. Pumps to aquariums should be turned off and the aquarium covered.
4. Dogs and/or cats should be "dipped" and treated with a designated flea control product such as "Advantage".
5. Premises will need to be vacated until the material is dry. The technician will give an approximate return time which will generally be within three hours following treatment.
6. If the yard is treated, please ensure that all toys, dog food, or other items that may be handled or ingested are removed or covered. Also, please be sure that grass is trimmed for maximum effectiveness.
